

fi::FigCache::getLockedTile

```
graph LR; A[fi::FigCache::getLockedTile] --> B[fi::FigCache::getLockedTile]; B --> C[fi::FigCache::getCachedLockedTile];
```

The diagram illustrates a sequence of calls. A box on the right contains the text 'fi::FigCache::getLockedTile'. A blue arrow points from this box to a box on the left containing 'fi::FigCache::getLockedTile'. From this left box, another blue arrow points to a third box on the left containing 'fi::FigCache::getCachedLockedTile'.
